DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-3, drawn to a substantially purified ALS enzyme cross-resistant to multiple herbicides.

Group II, claim(s) 4-13, drawn to an ALS gene encoding an ALS enzyme cross-resistant to multiple herbicides, a transgenic plant comprising said gene and a method of using said gene to make said transgenic plant.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The invention of Group I and Group II were known in the art at the time of the instant invention, hence the claims do not relate to a single general inventive concept because they lack the same special technical feature (see the PCT search report of record).

3. Applicant is advised that the reply to this requirement to be complete within one month (not less than 30 days) must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
